

HOME CARE INSTRUCTIONS SUTURE LINE CARE

Clean suture line twice (2) a day with a solution made up of one (1) part hydrogen peroxide and one (1) part saline or water

Using a clean gauze or a Q-tip, gently moisten the sutures and immediate surrounding skin with the solution

Apply either Polysporin / Neosporin / Bacitracin ointment to the suture line after each cleaning (twice a day)

If redness, swelling or drainage develops, contact our office at 757-623-0526

Suture lines may be exposed to water while bathing. Dry suture line by gently patting the area with a soft clean cloth or towel.
